Linea Blu s.r.l.

Excellence at the service of health and well-being

Linea Blu

Analyses market needs, and uses the possibilities offered by recent progress both in the field of cosmetics research and food supplements, paying particular attention to the natural ingredients.

Making a product

It means to create a work of art!

In developing each new product, I always try to put the priority of following a single objective: to gently pamper the needs of each of you.

Protecting health and well-being is a great incentive for me to improve the quality of my products, which are always made by selecting the best natural and top-quality active ingredients.

*Dr. Silvano Sanchini
Chemist Herbalist*

 **Linea Blu** s.r.l.

Linea Blu employs **qualified and specialized personnel**, some of whom have been trained in prestigious both Italian and foreign universities.

Production capacity and quality levels have reached standards of excellence thanks to the Research and Development sector, one of the best in the industry.

For this reason, it is possible to develop any type of the formula following the commercial indications and the required target; using typical and distinctive elements, and customizing the product to the highest level.

Quality controls start from the raw materials used and continue throughout the production phase.

The company is constantly developing, and increasing production capacity and quality thanks to continuous physical and microbiological controls. The laboratory is equipped with technological tools for control analysis and product evaluations.

The Supplements Department is equipped with 3 pans of different sizes, which allow us to adequately respond to different formulation needs, plus a small pan used for sampling. The weighing of the raw materials and the different processing phases of the supplement is carried out on precision scales, subjected to periodic calibration by an accredited body, while the potting machine takes care of inserting the correct number of pieces inside the bottle.

The flexibility of the Integrators Department allows us to guarantee competitive prices for both small and large batches. Supplements can be automatically jarred in bottles of different capacities, responding to different market demands.

Linea Blu has obtained the following certifications:

ISO 9001:2015 and GMP Food supplements

With the first certification, the company meets all the requirements of the internationally recognized standard relating

to the company's Quality Management System. The second certification guarantees compliance with the Good Manufacturing Practice (GMP) issued by the Food and Drugs Administration, for the production and jarring of food supplements in order to guarantee the consumer high standards of safety and quality of the product taken.

Linea Blu has chosen to use maltitol instead of sugar for the creation of its Supergelée. Maltitol, used instead of sugar, has numerous advantages that make it a versatile and healthy choice as a sweetener in food supplements:

- **Low glycemic index:** Maltitol has a lower glycemic index than sucrose, making it suitable for people with blood sugar control issues, such as diabetics.
- **Lower calorie intake:** It provides about 2.1 kcal/g, almost half as much as sucrose (4 kcal/g), making it useful in low-calorie products.
- **Noncariogenic:** Unlike sugar, maltitol is not fermented by bacteria in dental plaque, reducing the risk of tooth decay.
- **Similar sweetness to sucrose:** Maltitol has about 75-90% of the sweetness of sugar, allowing you to obtain a taste similar to that of traditional sugar, without the excessive caloric or glycemic impact.
- **Limited laxative effect compared to other polyols:** Compared to other polyol sweeteners (such as sorbitol), maltitol tends to cause fewer laxative effects, making it more tolerable for many people.
- **Thermal stability:** Maltitol is relatively stable to heat, allowing the finished supplement to be stored even in hot environments without the supergelee inside it sticking to each other and/or to the container that encloses them.

SUPERGELÉE

PHARMACEUTICAL TECHNOLOGY

COLD WORKING

Used to preserve the integrity of thermolabile ingredients, such as **probiotics and vitamins**.

COLD COATING

It guarantees the stability of the active ingredients on the surface of the Supergelée, we are the only ones on the market to use this technique to work the lactic ferments in spores.

CONTROLLED RELEASE

The outer coating allows for rapid sublingual release, the inner core releases the active ingredients gradually into the stomach, improving absorption and effectiveness.

DOUBLE ABSORPTION

ENHANCED EFFECTIVENESS OF SUPERGELÉE

SUBLINGUAL AND ORAL ABSORPTION:

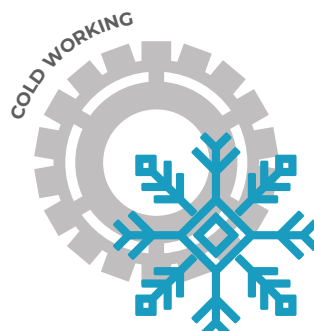

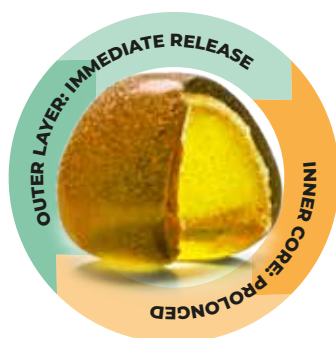

Supergelee is designed with a coating that encloses the active ingredients. This coating partially dissolves as soon as the Supergelée is placed in the mouth.

Absorption begins immediately at the level of the oral and sublingual mucosa, allowing the active ingredients to enter the bloodstream directly.

INTESTINAL ABSORPTION:

Once ingested, the remaining portion of the Supergelee continues its journey through the digestive tract to the intestine.

Here the second absorption takes place, where the active ingredients are further assimilated through the intestinal walls, ensuring a continuous release and extended.

MARKET INNOVATION AND EFFICACY

MAXIMUM EFFICACY

The combination of these technologies allows to maximize the effectiveness of the active ingredients, both through rapid sublingual release and through prolonged release in the stomach.

GREATER MEMBERSHIP

The pleasantness and ease of taking the gummies increase the likelihood that consumers will follow a regular supplement regimen.

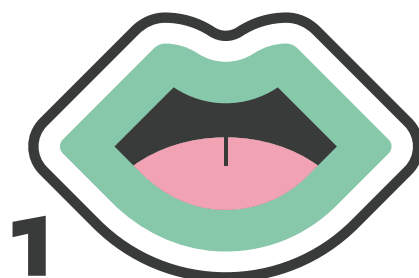

INNOVATION IN THE MARKET

This combination of technologies represents an innovation in the supplement market, offering a unique solution, improving the consumer experience and the effectiveness of supplements.

SUPERGELÉE FERMENTI LATTICI Junior

Dietary supplement with tyndalized lactobacilli and Inulin strains

PACK OF 60 SUPERGELÉE

VANILLA FLAVOUR

Exclusive blend composed of 3 different para-probiotic strains (*L. casei*, *L. acidophilus*, *L. plantarum*) thermally inactivated, thus ensuring high stability for the entire duration of the product.

BENEFITS:

- Immune-modulating action of the system immune.
- The immune response of the intestinal microbiota is aimed at destroying potentially harmful cells.
- Maintaining the barrier intact and efficiently intestinal which promotes correct absorption of nutrients.
- Inulin, derived from chicory root, has a prebiotic action, promoting the balance of intestinal flora. It also has a digestive function and participates in the regularity of intestinal transit, helping to give normal volume and consistency to the stool.

DUAL ACTIVE ABSORPTION TECHNOLOGY

Sublingual Absorption:

Vitamin C, riboflavin, vitamin B12: vitamin C, riboflavin and vitamin B12, being hydro are partially absorbed through the sublingual mucous membranes when the rubber is chewed. Vitamin C and riboflavin contribute to the protection of cells from oxidative stress, vitamin B12 contributes to the normal function of the immune system.

Gastric absorption:

• **Inulin:** Once swallowed, inulin arrives in the gastrointestinal tract, where it acts as a prebiotic fiber, promoting the growth of beneficial bacteria in the gut.

• **Tyndalized lactic acid bacteria:** Tyndalized milk enzymes, although not viable, can exert beneficial effects on the intestinal bacterial flora, improving the balance of the gut microbiome and supporting digestive function.

• **Zinc:** contributes to the normal function of the immune system.

HOW TO USE:

It is recommended to take 2 supergelée a day to be distributed throughout the day. Taste the supergelée in the mouth for at least 1 minute before swallowing.

QUALITATIVE-QUANTITATIVE COMPOSITION

SUPERGELÈE ALOE VERA

Food supplement based on Aloe Vera

PACK OF 120 SUPERGELÈE

GREEN APPLE FLAVOUR

Aloe promotes a purifying function of the body, while Lemon Balm helps the digestive function. Finally, it has an antioxidant and promotes relaxation and mental well-being. The formulation with vitamin B6 contributes to the normal energy-yielding metabolism and normal function of the immune system. The core is enriched with vitamin c and zinc. Vitamin C contributes to the protection of cells from oxidative stress. Zinc contributes normal macronutrient metabolism.

DUAL ACTIVE ABSORPTION TECHNOLOGY

Sublingual Absorption:

Vitamin C contributes to the protection of cells from oxidative stress, while Vitamin C contributes to the protection of cells from oxidative stress. Vitamin B6 participates in the normal functioning of energy metabolism and in the normal function of the immune system. Both of these vitamins have a higher sublingual absorption.

Gastric absorption:

Aloe vera is mainly known for its purifying and digestive properties, and its beneficial particles are generally better absorbed in the stomach. Gastrointestinal absorption allows you to fully exploit the properties of Aloe for intestinal regularity and function hepatic.

Lemon balm also contributes further to digestive function and gas reduction when released and gradually absorbed into the stomach.

Zinc: this mineral participates in normal macronutrient metabolism.

HOW TO USE:

It is recommended to take 4 Supergelée a day to be distributed throughout the day. Taste the upergelée in the mouth for at least 1 minute before swallowing.

SUPERGELÉE FERMENTI LATTICI

Food supplement with strains of Tyndallized lactobacilli & Inulin

PACK OF 60 SUPERGELÉE

VANILLA FAVOUR

Exclusive blend composed of 3 different para-probiotic strains (*L. casei*, *L. acidophilus*, & *L. plantarum*) thermally inactivated, thus ensuring high stability for the entire duration of the product.

BENEFITS:

- Immune-modulating action of the system immune.
- Immune response of the intestinal microbiota aimed at destroying potentially harmful cells.
- Maintaining an intact and efficient intestinal barrier that promotes correct absorption of nutrients.
- Inulin, derived from chicory root, has a prebiotic action, promoting the balance of intestinal flora. It also has a digestive function and participates in the regularity of intestinal transit, helping to give normal volume and consistency to the stool.

DUAL ACTIVE ABSORPTION TECHNOLOGY

Sublingual Absorption:

Vitamin C, Riboflavin, vitamin B12: vitamin C, riboflavin and vitamin B12, being are partially absorbed through the sublingual mucous membranes when the rubber is chewed. Vitamin C and riboflavin contribute to the protection of cells from oxidative stress, vitamin B12 contributes to the normal function of the immune system.

Gastric absorption:

• **Inulin:** Once swallowed, inulin arrives in the gastrointestinal tract, where it acts as a prebiotic fiber, promoting the growth of beneficial bacteria in the gut.

• **Tyndalized lactic acid bacteria:** Tyndalized milk enzymes, although not viable, can exert beneficial effects on the intestinal bacterial flora, improving the balance of the gut microbiome and supporting digestive function.

• **Zinc:** contributes to the normal function of the immune system.

HOW TO USE:

It is recommended to take 2 Supergelée a day to be distributed throughout the day. Taste the supergelée in the mouth for at least 1 minute before swallowing.

QUALITATIVE-QUANTITATIVE COMPOSITION

Quantity of active ingredients per gummy with an average weight of: **1,33 g**

PACK OF 60 SUPERGELÉE

BROWN TASTE

Melatonin-based food supplement which, at the dosage of 1 mg just before bedtime, contributes reducing the time required to take sleep. Chamomile promotes relaxation (sleep) and mental well-being, while vitamin B6 and Vitamin C contributes to normal function Psychological.

Zinc completes the formulation participating in the normal function of the system immune.

DUAL ACTIVE ABSORPTION TECHNOLOGY

Sublingual Absorption:

Immediate Effect: Melatonin, vitamin B6 and vitamin c absorbed sublingually provide a quick response to promote relaxation and reduce the time it takes to fall asleep. Melatonin is particularly effective in regulating the sleep-wake rhythm, while vitamin B6 and vitamin C support normal psychological function.

Gastric absorption:

Prolonged Effect: The gradual absorption of chamomile extract and zinc into the tract ensures a continuous and prolonged effect of relaxation, well-being, digestion, immune system support.

HOW TO USE:

we recommend taking 1 supergelée per day, preferably chewed shortly before going to bed. Taste Supergelée them in the mouth for at least 1 minute before swallowing.

SUPERGELÉE ZANZA BLOCK PROTECTION

Dietary supplement with sweeteners

PACK OF 60 SUPERGELÉE

CITRUS FLAVOUR

Food supplement based on Ledum Palustre, Plant that finds great use in lotions as a mosquito repellent. The formulation is enriched with Sage which helps to regularise the process of sweating and has an antioxidant function, as well as Vitamin C and Grapefruit seeds. The latter also contribute to the functionality of the microcirculation. Finally, Vitamin C and Vitamin A promote the maintenance of a normal skin and support normal function of the immune system.

DUAL ACTIVE ABSORPTION TECHNOLOGY

Sublingual Absorption:

Vitamin C: Being water-soluble, Vitamin C can be partially absorbed through the sublingual mucous membranes, providing rapid antioxidant support.

Gastric absorption:

Marsh Legum, Sage, Grapefruit Seeds, Zinc and Vitamin A: these active ingredients will be released by the gradually and absorbed in the gastrointestinal tract. The Ledum Palustre is known for its repellent properties against mosquitoes, while Salvia regulates sweating and has antioxidant properties. Grapefruit Seeds support the functionality of microcirculation and They offer additional antioxidant benefits. Zinc and vitamin A promote the maintenance of a normal skin and support the normal function of the immune system.

HOW TO USE:

It is recommended to take 2 supergelée a day, to be taken throughout the day. Tasting the supergelée in the mouth for at least 1 minute before swallowing.

SACHETS

FLUNAC 600

Food supplement
Immune system support action*
and the fluidity of bronchial secretions**

Based on N-Acetylcysteine, Zinc*,
Propolis, Adhatoda and plant extracts**

PACK OF 10 SACHETS OF 2.3 g

CITRUS FRAGRANCE

Based on N-Acetylcysteine, Zinc, and Propolis with titrated extracts of Adhatoda, Acerola, Grindelia, and Althea. Zinc contributes to the normal function of the immune system while Adhatoda promotes the fluidity of bronchial secretions. Contains Propolis in association with Acerola which promotes the body's natural defenses. Grindelia extract supports the functionality of the upper respiratory tract. Althea promotes throat well-being.

HOW TO USE: we recommend to take one sachet per day, preferably after dinner, pouring the contents into a large glass of water (at least 200 ml) then mix and take after completely dissolving.

FLUIDIFYING SYRUP FLURESPIRO Adults and Juniors

Food supplement Immune system support action*
and the fluidity of bronchial secretions**

Based on Adhatoda, Grindelia, Plantain and Marshmallow
With eucalyptus honey for the little ones

150 ml BOTTLE with measuring cup

HONEY Aroma

Food supplement with honey and herbal extracts of Adhatoda, Grindelia, Plantain, and Marshmallow.

Adhatoda helps the fluidity of bronchial secretions and the well-being of the throat. Grindelia together with Plantain has an emollient and soothing action on the oropharyngeal mucosa.

Marshmallows and Plantain also promote the functionality of the mucous membranes of the respiratory system.

Eucalyptus honey gives the product a pleasant flavor, making it ideal for children.

HOW TO USE: we recommend a measuring cup equal to 10 ml of FLURESPIRO, 2 to 4 times a day, divided throughout the day, and taking the last dose before going to bed. Shake before use and close the bottle tightly after use.
